## About Me

Junior software developer, enthusiast about new technologies.

I love learning about new tools and frameworks, writing backend code on my own projects and see my apps taking shape. I'm also an avid reader.

My main goal is become a better developer and learn something new everyday. Working in a team is something exciting for me, and I think I could learn and improve both ways in a job with young and talented developers.

## Personal Data

**First name:** Cristian ; **Last name:** Achille ; **Birth Date:** 02/25/1993
